FRANKLIN BOILER WORKS CO.

TROY, N. Y. Formerly { ALBANY BOILER WORKS. FRANKLIN IRON WORKS.

SOLE MANUFACTURERS OF THE FRANKLIN WATER TUBE BOILER.

IN 1899 this Company purchased the Franklin Iron Works from Thomas S. Sutherland, its owner, together with his good will. Mr. Sutherland at the time retired from the boiler trade.

Owing to the rapid increase in business, we have made many additional and extensive improvements to our plant and its equipment. We have recently placed on the market a Water Tube Boiler of our own design, known as the *Franklin Water Tube Boiler*, which we feel represents the latest and most satisfactory developments of this type.

We believe that we are in an excellent position to make satisfactory quotations on all kinds of boilers, tanks, stacks and flume work, as well as on draft tubes, wheel cases, and all kinds of plate and sheet steel work.

Giving the name of each street, and showing what other streets and places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained; as, for instance, wishing to know at what part of Second street No. 168 comes, look at Second street, on page 60, and find that Liberty street crosses at 156, and Washington street at 178, showing that 168 Second street would come half way between Liberty and Washington streets.

This Company owns the entire water power of the Mohawk River at Cohoes, embracing the celebrated Cohoes Falls. Aggregate fall, one hundred and twenty feet, giving nearly ten thousand horse power. The Company's gate house and dam are among the finest structures of the kind in the United States.

The canals are so constructed as to give a succession of falls from one canal to another, varying in height from twelve to twenty-five feet. The power is leased by the Company, with land for factory building, in perpetuity, at an annual rental of about twenty dollars per horse power, and, considering the quality, is the cheapest in the country. It is an unfailing power; and during the past few years, while most of the water powers in the country have failed for a time, Cohoes has had an abundant supply without one minute's stoppage. About one-third of this magnificent power is unappropriated, and appurtenant thereto are some of the finest factory sites to be found anywhere.

Cohoes is situated at the confluence of the Mohawk and Hudson Rivers, about four miles from Troy and ten from Albany, and is eligibly located with reference to New York and other markets, and possesses superior advantages for transportation to market, either by river, canal or railroad, having two canals and two railroads running through it. It is a thriving young city of nearly twenty-five thousand inhabitants, and contains some of the finest cotton and other factories in the United States.

CHARLES S. FRANCIS,

...TROY, N. Y...

The Troy (N. Y.) Situation.

The newspapers of Albany and Troy had a prosperous year of it. The Sunday papers, with one or two exceptions, fared particularly well, and especially so for the four Sundays previous to Christmas. One most interesting feature of the Albany and Troy newspaper situation is that the Troy Northern Budget carried a greater total of agate lines than did the Sunday papers of Albany, notwithstanding the fact that Albany has 95,000 citizens against 61,000 for Troy.

The Troy Northern Budget is a newspaper of power in its extended field, and is to its constituency what the Boston Globe is to Boston; the Chicago Tribune to Chicago; the Philadelphia Record to Philadelphia, etc. It was founded in 1797 and is therefore one of the oldest newspapers of northern New York. For these many years it has been regarded as one of New York State's best business-bringing advertising mediums. Conducted entirely upon legitimate business lines, it has carried the respect of its readers in all its ideas and campaigns.—*Newspaperdom, Feb.* 19, 1903.

J. C. McNAMARA,

MANUFACTURER OF

PROTECTIVE AWNINGS (Patented 1900.) AND TENTS.

Canopies, Flags, Banners, &c., also Nets and Twine.

PROTECTIVE PULLEY BLOCK. Guaranteed superior to any made. Patented February 17th, 1891. This pulley is made of the best malleable iron, with swivel eye and self-adjusting guard plate, which guides the rope to the centre of the wheel, protects the cloth from the wheel, thereby allowing awning to work with great ease.

This Combination Awning

is the latest and most complete awning creation known to the trade. It is attachable and detachable. It may be detached from the building in a minute by simply loosening without withdrawing the screws, and not injure the surface nor mar the form or appearance of the window or door frames, nor deface the building in the least.

You can readily notice the disfigurement and worn condition of the fine-finished window and fine hard wood door frames where the old style awning and the old style attachments are in use—the frames are punctured and torn, split and battered and disfigured with rusty hooks, staples, screw-eyes, pulleys, slide rods, cleats and other fixtures—and these unsightly things remain after the awnings are removed and until their replacement.

Buy McNAMARA'S latest and best Improved Awnings and get rid of all these defacements and annoyances. He is the inventor and patentee. His Roller Awning, also, is perfect and unsurpassed and, with his patent attachments, complete in detail.

J. C. McNAMARA,
